MySQL Practice: String & Date Functions

Sample Table: employees

emp_id	first_name	last_name	department	salary	hire_date
101	Rahul	Sharma	Sales	45000	2020-01-15
102	Priya	Mehta	HR	55000	2019-03-12
103	Amit	Verma	IT	60000	2021-06-01
104	Neha	Kapoor	Sales	48000	2022-07-10
105	Karan	Singh	Finance	52000	2020-11-23

🔤 String Function Queries

1. Convert names to uppercase

```
SELECT UPPER(`first_name`) AS `FirstName_Upper`
FROM `employees`;
```

2. Convert names to lowercase

```
SELECT LOWER(`last_name`) AS `LastName_Lower`
FROM `employees`;
```

3. Find length of first names

```
SELECT `first_name`, LENGTH(`first_name`) AS `Name_Length`
FROM `employees`;
```

4. Concatenate first and last names

```
SELECT CONCAT(`first_name`, ' ', `last_name`) AS `Full_Name`
FROM `employees`;
```

5. Extract first 3 letters of first name

```
SELECT LEFT(`first_name`, 3) AS `ShortName`
FROM `employees`;
```

6. Replace department name

```
SELECT REPLACE(`department`, 'Sales', 'Marketing') AS `Updated_Department`
FROM `employees`;
```

📅 Date Function Queries

7. Extract year from hire date

```
SELECT `first_name`, YEAR(`hire_date`) AS `Hire_Year`
FROM `employees`;
```

8. Extract month from hire date

```
SELECT `first_name`, MONTH(`hire_date`) AS `Hire_Month`
FROM `employees`;
```

9. Current date

```
SELECT CURDATE() AS `Today`;
```

10. Calculate years of service

```
SELECT `first_name`, TIMESTAMPDIFF(YEAR, `hire_date`, CURDATE()) AS `Years_of_Service`
FROM `employees`;
```

11. Add 6 months to hire date

```
SELECT `first_name`, DATE_ADD(`hire_date`, INTERVAL 6 MONTH) AS `Probation_End`
FROM `employees`;
```

12. Difference in days since hire date

```
SELECT `first_name`, DATEDIFF(CURDATE(), `hire_date`) AS `Days_Since_Hire`
FROM `employees`;
```
